Finals study planner

Fill in sections 1 and 2 once. Then each study day, test yourself first and look at your notes second.

1. Exams and dates

One line per exam: the course, the date, and what it covers.

2. Topics to cover

Split each course into topics that fit one session. Plan at least two visits to each.

3. Each study session

1. Write what you remember on a blank page.
2. Answer questions with your notes closed.
3. Check your answers, then reread only your misses.
4. Write tomorrow's questions from what you missed.

4. This week's misses

Questions you got wrong. They go back into the plan.

Before each exam

- [ ] I visited each topic at least twice, with a gap between.
- [ ] I mixed subjects instead of finishing one block at a time.
- [ ] I went through my misses, not new material.
- [ ] I stopped at a sensible hour and planned to sleep.
